Test Cases

Scenario: Register a User on the Platform
Given that I am an Administrator
When I register a new user on the platform by providing their name, email, and assigning them a role
Then I should be able to see the new user in the list of registered users.

Feature: Login
AS Apprentice Radar user
I WANT TO
make a login to the system
SO THAT
I can use the system services

Scenario: Login Successful
Given the user is in the login page
When the user send a login request with the <email> and the <password>
Then The user should be redirected to the main page and should see the active modules depending on the role.

Scenario: Login Failed
Given the user is in the login page
When the user sends a login request with an incorrect <email> or <password>
Then the user should see an error message indicating that the login failed, and the user should not be redirected to the main page.

Feature: Create a New Radar
  As an Operation Leader
  I want to be able to create a new radar

  Scenario: Successfully create a new radar
    Given that I am an Operation Leader
    When I create a new radar by providing a name and defining the evaluation criteria and level of appropriateness for each descriptor in the knowledge areas
    Then the new radar should be successfully created and added to the list of available radars.

Feature: List Radars
  As an Operation Leader
  I want to be able to view a list of available radars

  Scenario: Successfully list available radars
    Given I am an Operation leader
    When I request the list of available radars
    Then the system should return a list of radars.

Scenario: Create a New Training League
Given that I am a Coach
When I create a new training league and associate it with a radar
Then I should be able to add students and input the final score they get at the end of the training based on the descriptor.

Feature: Delete a Radar
  As an Operation Leader
  I want to be able to delete an existing radar

  Scenario Outline: Delete a radar
    Given that I am An Operation Leader
    When I make the request to delete an existing radar with <id>
    Then Should display a status message <status> depending on whether the id exists or
not.
    Examples:
      | id | status |
      | "BorrarDespues" | 200 |
      | "LM" | 400 |

Scenario: List Existing Training Leagues
Given that I am a Coach
When I navigate to the training leagues page
Then I should see a list of all the existing training leagues along with their associated radars and the number of students enrolled in each league.

Scenario: Delete an Existing Training League
Given that I am a Coach
When I select the option to delete the league
Then the league should be removed from the system and all associated data, including enrolled students and associated radars, should be deleted as well.

Feature: Delete an apprentice from the list
  AS a coach of a training league
  I WANT to be able to delete apprentices
  SO THAT I can remove them from the list

  Scenario Outline:
    Given a coach have access to the platform
    When the coach use the apprentice <id>
    Then receives a response <code>
    And the apprentice is deleted from the list
    Examples:

```
| id     | code |
| test1  | 200  |
| test543 | 400  |
```

Feature:
  AS a coach of a training league
  I WANT to be able to see the apprentices
  SO THAT I can add them to a training league

  Scenario Outline:
    Given access to the apprentices list
    When an coach check their <id>
    Then gets a response <code>
    And the coach can see the apprentice information
    Examples:
```
| id     | code |
| test1  | 200  |
| test543 | 400  |
```

Feature: Adding apprentices to the platform
  AS a coach of a training league
  I WANT to be able to add students
  SO THAT I can follow their progress

  Scenario Outline:
    Given a coach has access to the platform
    When the coach inputs the <id>, <name>, <email> of an apprentice
    Then gets a response <code>
    And the apprentice is created
    Examples:
```
| id    | name         | email             | code |
| test1 | Andres Perez | test1@hotmail.com | 201  |
```
